# Painting Teaching Module

## Introduction:

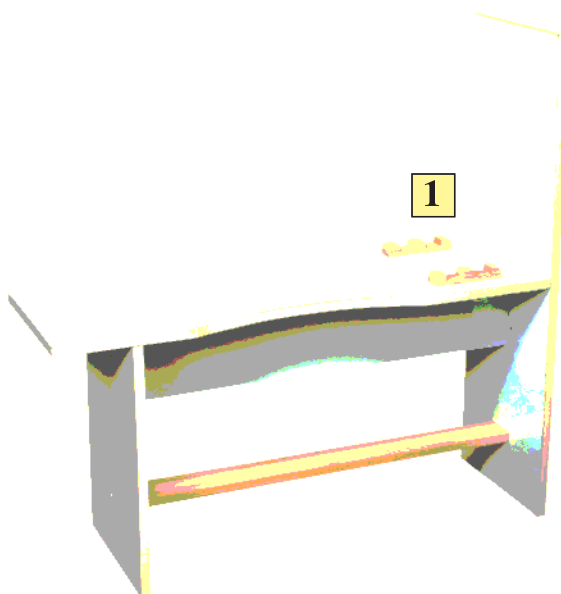

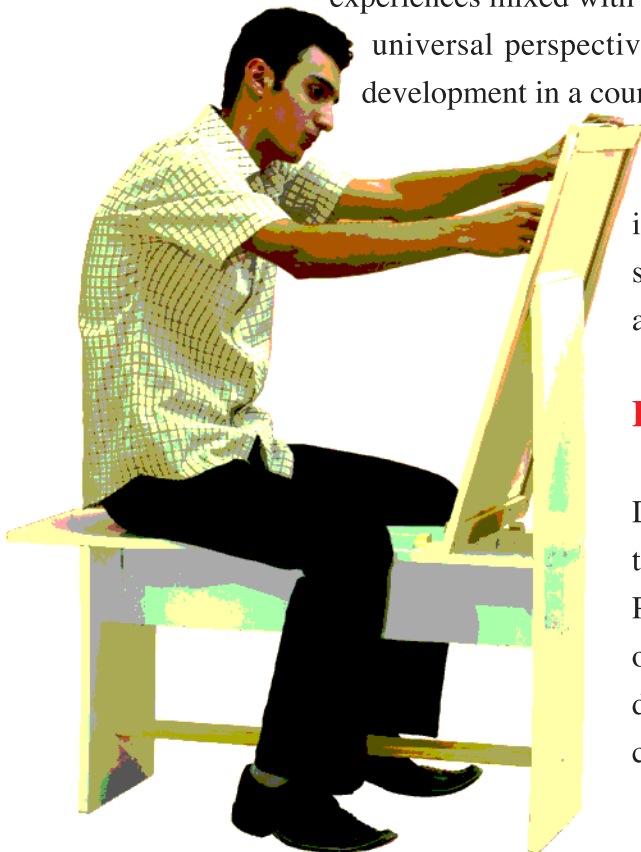

Art is both a complicated and tangible subject which can help one to understand society and the surrounding physical environment. Moreover, it can help the personality to grow and flourish because it combines the two elements of logic and emotion. What is known today as science and technology is a combination of experiences mixed with art. Because of our artistic cultural background as well a universal perspective on culture of art, art has become a pillar of cultural development in a country.

The goal of producing the art horse (bench easel) and easel is-in addition to providing a means for the country to be self-sustaining in this domain-allowing for ease of instruction in art education centers.
